EXPERIENCE

Software Developer & Integrator II

April 2018 – Present

USAA | Plano, TX

- Provide oversight for and peer review code changes, and follow defined change and release process in order to deploy enterprise applications to production
- Develop enterprise mobile applications utilizing TypeScript, Ionic/Angular, Cordova, and HTML5/CSS3
- Write Node.js scripts and Cordova hooks to automate build tasks on a continuous integration/continuous delivery pipeline in GitLab
- Planned software architecture, designed UI, and led a team of developers to deliver mobile application for providing information and push notifications about IT availability and outages integrating ServiceNow, Salesforce, and Firebase Cloud Messaging

Software Developer & Integrator III

August 2016 – April 2018

USAA | Plano, TX

- Developed enterprise mobile applications utilizing TypeScript, JavaScript, Ionic/Angular, Cordova, and HTML5/CSS3
- Integrated mobile applications with cloud platforms such as Salesforce and ServiceNow by developing and/or utilizing workflows and web services
- Performed defect fixes in apps through analysis, debugging, design, and code using tools such as Chrome Inspect, Safari Web Inspector, iOS Simulator, Android Studio
- Provided project estimates, managed financials, and performed scrum master duties such as facilitating iteration planning, backlog grooming, and communication with the business customer, while maintaining responsibilities as a core developer for a project that was successfully delivered on time and within budget

IT Intern

June 2015 – August 2015

USAA | Plano, TX

- Developed native Android mobile app in Java using Android Studio
- Worked on an agile team in weekly, fast-paced sprints
- Designed and developed responsive dashboard in HTML/CSS, JavaScript, and AngularJS used by IT project teams to monitor code quality metrics
- Composed Java REST services to aggregate data from SQL database

Software Engineering Co-Op

December 2014 – October 2015

L-3 Link Training & Simulation | Arlington, TX

- Analyzed, designed, and developed Windows application using C++ and Qt providing testing and debugging capabilities for 3D environment engine featuring graphs with freely transformable nodes and connectors, message queuing and processing, and ability to save and open custom graphs from file system
- Implemented Windows notification tray icon for desktop application using C++ and Win32 to indicate status and provide context menu of options to control 3D environment engine

Web Development Intern

May 2014 – November 2014

Ayoka Systems | Arlington, TX

- Developed features in a web application in ASP.NET C#, JavaScript, jQuery, and HTML/CSS used to facilitate sales and inventory management in agriculture company
- Wrote SQL queries to retrieve sales and inventory data
- Collaborated with business customer to gather and understand requirements
